# About BEYOND RecordSearchCatalogBridge

## About this Extension

BEYOND RecordSearchCatalogBridge is an extension for Microsoft Dynamics 365 Business Central.  
It was developed by:

## BEYONDIT GmbH

Schauenburgerstraße 116  
24118 Kiel  
Germany  
[moin@beyondit.gmbh](mailto:moin@beyondit.gmbh)  
[+49 431 3630 3700](tel:+4943136303700)

BEYOND RecordSearchCatalogBridge combines the functionalities of BEYOND RecordSearch and BEYOND Catalog.  
You can search for records and Beyond Catalog Items.

You receive the search results within a few milliseconds and can double-click on the record found (for example, an item) to transfer it to the lines. The search results are displayed in a clearly arranged window. To avoid tying up computing capacity for the search, 50 search results are retrieved from your database at a time. If more results are required, you can automatically load more search results by scrolling down.

The latest version of this documentation can be found at the following link: [BEYOND RecordSearchCatalogBridge Documentation](#).

### NOTE

#### Dependencies on or to other apps

Additional, basic applications are required to use BEYOND RecordSearchCatalogBridge. The following applications are required to use BEYOND RecordSearchCatalogBridge:

- [BEYOND RecordSearch](#): Extends Business Central with a search term column to search for records.
- [BEYOND Catalog](#): Extends Business Central with BEYOND Catalog Items that can be used and updated across tenants.
