BEYOND Signature is an app that integrates basic editor functions for electronic signatures in your Business Central. Please note that the app must be used in conjunction with other apps so that you can capture signatures.

For example, you can capture signatures for your individual reports or receipts when using [Beyond ReportsV2](#) or [Beyond Mobile Service](#).

The latest version of this documentation can be found at the following link: [BEYOND Signature Documentation](#).

NOTE

Dependencies from or to other apps

Additional, basic applications are required to use **BEYOND Signature**. The following applications are required to use **BEYOND Signature** and are automatically installed and licensed:

- **BEYOND License**: Management of trial and full licenses for apps/add-ins from BeyondIT.
