General Information

This documentation contains important information that you must observe when following the descriptions. The information is highlighted as notes and arranged according to type and importance. The notes are listed below in ascending order of importance:

> **ⓘ TIP**
>
> This represents **no risk**. In addition to the classic clicking on options, Business Central also offers the option of using so-called shortcuts. Shortcuts are key combinations with which you can also execute the desired action in the user interface. By using shortcuts, you can work faster and more effectively. Try the key combination and you will be surprised how much faster you can work.

> **ⓘ NOTE**
>
> This represents **no risk**. This note contains important information on the correct use, configuration or operation of the software. Follow these instructions to avoid inefficiencies and unnecessary support tickets. For example, this note can show you that an option is hidden and tells you how to proceed if you want to show it again.

> **☞ IMPORTANT**
>
> This represents a **low risk**. This notice refers to non-critical issues that may lead to undesired behavior or configuration problems. May affect user experience or functionality if not considered.

> **⚠ CAUTION**
>
> This represents a **medium risk**. This notice indicates a potential problem that could affect system stability or data integrity. Failure to comply may result in errors, loss of performance or partial service interruptions. The errors caused by non-compliance only affect the app itself and prevent you from working with data within the app.

> **⚠ WARNING**
>
> This represents a **high risk**. This notice indicates an immediate and serious risk to the productive system. Failure to observe this warning may affect the entire system. There is a risk of loss of critical data or total system failure, leading to prolonged downtime. It may not be possible to restore the data and a backup must be imported.

Beyond TradeInRecordSearchBridge is an extension for Microsoft Dynamics 365 Business Central.

Beyond TradeInRecordSearchBridge combines the functionalities of Beyond TradeIn and Beyond RecordSearch. You can use the search function of Beyon RecordSearch on trade-ins.

You receive the search results within a few milliseconds and can double-click on the record found (for example, an item) to transfer it to the lines. The search results are displayed in a clearly arranged window. To avoid tying up computing capacity for the search, 50 search results are retrieved from your database at a time. If more results are required, you can automatically load more search results by scrolling down.

The latest version of this documentation can be found at the following link: Beyond TradeInRecordSearchBridge Documentation.

> **ⓘ NOTE**
>
> **Dependencies on or to other apps**
>
> Additional, basic applications are required to use **Beyond TradeInRecordSearchBridge**. The following applications are required to use **Beyond TradeInRecordSearchBridge**:

- Beyond TradeIn: Allows you to take items in payment. The trade-in is similar to a sales claim. In the process, a sales credit memo is created for the business partner.
- Beyond RecordSearch: Extends Business Central with a column in the documents that allows to search for records.
